Genesis

- Genesis, the book of beginnings.
 - The word for Genesis in Hebrew is ***"be-rasheet"***, which means, *in the beginning*. ***"Rasheet"*** means, *choice or first fruits*. "God set in motion His choicest work.. Genesis provides essential doctrines for the comprehension of the New Testament", or Greek scriptures.
- Some essential truths
 - God is creator
 - All things were designed and created in divine order.
 - God cares for His creation and gives humankind the capability to take care of and protect His earthly dominion.
- Science & History and Genesis
 - Genesis is not a scientific or historical textbook in the modern or postmodern sense. It must be read and understood in the spirit of God, and through the lens of a narrative of ancient Israel's traditions and concepts of the past– a mixture of myths and legends, cultural memories,

revisions of tradition and literary brilliance... Likewise, it has been written that humankind might understand God as creator and the author of His creation. It is the beginning of our story with God. Finally, it comprises 50 chapters and although Moses is credited with writing this book some scholars believe that there are a number of writers who contributed to writing this book at a later period during the monarchy of Israel.
